

## Paper Food Pails

Pails are made from a thicker grade of paperboard that is coated on the inside & outside with a fine layer of PE (polyethylene).

The pails are freezable & will not 'wilt' as the paper absorbs moisture.

They do not have a wire handle so are microwavable & have excellent heat retention.

The PE coating enables the pails to be wiped clean, therefore prevents staining.

No leakage due to fully sealed sides.

Lid flaps allow steam to escape preventing any 'cooking on' from retained heat.

The pails comply with Australian recycling standards.

<b>No.8</b>	240ml	60mmL x 45mmW x 65mmH	Pack 25	\$ 11.10
			Carton of 450	\$ 140.40
